- Mahtma Gandhi University
- 2020-2023
Kottayam, Kerala

Skills

- C Programming
- C++ Programming
- Python
- HTML, CSS, Javascript

Project

● Vaccine Remainder System

The "Vaccine Reminder System" in Python sends reminders for vaccination appointments through email, SMS, or push notifications, helping people stay updated with their immunization schedules.

● House Rental System

The Python "House Rental System" connects landlords with tenants, streamlining property listing and rental searches. It facilitates communication and document management to simplify the rental process for both parties.

● Cab Booking managment System

The Python "Cab Booking Management System" streamlines ride booking and tracking for passengers and drivers. It simplifies the process, allowing users to request rides, view available drivers, and handle payments seamlessly.
